Experience

Staff Data Science Software Engineer

Villach, Austria

INFINEON TECHNOLOGIES AUSTRIA (KAI)

Apr 2024 - Present

Technical lead for a team of 4 engineers, shaping project direction and planning.

- Built a fully automated AI monitoring service — daily data extraction, inference, and critical-event alerting
- Shipped a Next.js application serving 100+ users, unifying monitoring service management, a searchable reference catalog, and a rebuilt labeling and preprocessing workflow (migrated from Streamlit)
- Automated monthly reporting on platform usage and model outputs
- Defined the end-to-end AI lifecycle strategy, plus the software, testing and data-management standards the data science team works to

Stack: PyTorch, Next.js, MLflow, FastAPI, MySQL + SQLAlchemy, Polars, OpenShift

Data & ML Engineer

Villach, Austria

INFINEON TECHNOLOGIES AUSTRIA (KAI)

Apr 2022 - Mar 2024

Built from scratch the end-to-end ML platform for a pattern recognition use case — from data labeling to production serving.

- Developed a multi-model serving RESTful API — a single interface for hosting and querying any registered model
- Implemented a model registry with versioned storage and prediction caching to cut redundant inference
- Delivered three web interfaces that made the platform self-service: labeling for domain experts, model registration for data scientists, on-demand prediction access and visualization for non-technical users

Stack: PyTorch, FastAPI, Streamlit, MySQL + SQLAlchemy, OpenShift

Master Thesis Intern

Villach, Austria

INFINEON TECHNOLOGIES AUSTRIA (KAI)

Jul 2021 - Mar 2022

Researched, developed and deployed an NLP classifier to improve consistency in FMEA (Failure Mode and Effects Analysis) documentation, flagging inconsistent or misaligned entries across failure records — basis of my master's thesis.

Stack: Keras (Tensorflow), Pandas, HuggingFace, NLTK, Streamlit, OpenShift

Skills

Programming Languages

Python, TypeScript, SQL, Rust

Spoken Languages

Italian, English, German

Education

Università di Udine & Universität Klagenfurt

Udine, IT & Klagenfurt, AT

M.Sc. IN COMPUTER SCIENCE (DOUBLE DEGREE)

October 2019 - March 2022

Grade: 110/110 cum laude

Mainly focused on: Artificial Intelligence, Data Engineering and Cybersecurity

Thesis: Improving FMEA consistency in semiconductor manufacturing through text classification

Università di Udine

Udine, IT

B.Sc. IN COMPUTER SCIENCE

October 2016 - October 2019

Grade: 109/110

Thesis: Planning and development of a blockchain-based web application for the art market
